PROFILE

IT undergraduate specialising in Cloud Engineering at APU, with a Diploma in Information Technology from INTI (CGPA 3.45). I build and ship projects end to end, from full-stack web apps with automated tests and CI to networked ESP32 devices. Interested in software development, cloud and DevOps.

EDUCATION

BSc (Hons) in Information Technology, Cloud Engineering | Asia Pacific University (APU) — 2026 – Present

- Awarded a 10% Merit Scholarship and exemption from 10 modules.

Diploma in Information Technology | INTI International University & Colleges, Subang — 2022 – 2024

CGPA 3.45

EXPERIENCE

Registrar, Administration & Web Development | OTC Training Centre

- Handled student registration and day-to-day administration for the centre.
- Designed and developed web pages for the centre.
- Built an automation workflow to collect contact emails for outreach.

PROJECTS

Trade Journal | Full-stack trading journal web app — 2026

Next.js · React · TypeScript · Tailwind CSS · Supabase · Vercel — Live site · Code

- Built a multi-account journal with Tradovate CSV import, an analytics dashboard (win rate, P&L, expectancy), a calendar heat map, setup playbooks and pre-trade checklists.
- Modelled the data in Supabase PostgreSQL with row-level security, authentication and file storage for chart screenshots; client data fetching with TanStack Query.
- Set up GitHub Actions CI to run lint, type-check, Vitest tests and a production build on every push; deployed on Vercel.

ESP32 Touchscreen IoT Projects | Embedded & networking — 2026

C++ · Arduino · ESP32 · Wi-Fi · Bluetooth LE · REST/JSON

- Ran a web server on the ESP32 so a phone can set an RGB LED from a custom HTML/CSS/JS page, kept in two-way sync with on-device touch sliders.
- Fetched live weather data from the Open-Meteo REST API, parsed the JSON and displayed it on the touchscreen.
- Built a Bluetooth media remote; traced a Bluetooth start-up failure to a regression in the ESP32 Arduino core and fixed it by pinning an earlier core version.

Inventory Management System | Diploma capstone project — 2024

Python · Flask · SQLite · HTML/CSS/JavaScript — Code

- Built a web app with Flask and SQLite to record and track stock levels.

SKILLS

Languages	Python, TypeScript, JavaScript, Java, C++, PHP, SQL, HTML, CSS
Frameworks	Next.js, React, Tailwind CSS, Flask, Bootstrap, TanStack Query
Data & platforms	Supabase (PostgreSQL), SQLite, Vercel, GitHub Actions
Tools	Git, GitHub, VS Code, PyCharm, Vitest, Arduino IDE
Currently learning	Docker, Linux, cloud infrastructure
